

STUDENT SUCCESS STORY

Arun and Christy: Follow up success story

As we learn about the struggles that many children in India have had to face, it is great to read the success stories and learn about the lives that have been altered with the support of LIFT USA. We hear about people who did not have access to education. Thanks to LIFT, however, opportunities have been available to them and their lives have forever changed.

Follow-Up Story

Two of our LIFT students have shared their story with us before. Arun and Christy both came from families who were struggling. When Arun was 18 and when Christy was 17, they got involved with LIFT and began an impressive academic path. Arun received his Bachelor's degree in Mathematics and then went on to get a Master's degree in Computer Applications. Christy received her Bachelor's degree in Physics and also went on to get a Master's degree in Computer Applications.

So, where are they now? These two motivated LIFT graduates are currently living in the United States in the city of Denver. They plan to live here for a few more years before returning home to India. Arun works as a Senior Software Engineer with United Health Group. Christy is a busy mom at home with their baby girl Jianna, who was born less than a year ago in Colorado.

They are both so proud to be able to support their families back in India. Their gratitude for LIFT shows in their desire to make the best lives for themselves and for their families. They even give back to LIFT now so that other students who are in need of life-changing opportunities can have access to education and to a better life.
